

The data on **water** consumption in the world is provided by the United Nations (UN, UNESCO, and FAO)

Worldwide, agriculture accounts for 70% of all **water** consumption, compared to 19% for industry and 11% for domestic use.

How much water do we use?

**97.5% of the world's water is locked in seas and oceans too salty for human use. And most of the remaining 2.5% is in the ice caps.**

So we humans depend on the tiny bit available as fresh **water** – an essential natural resource for life. That's why we have to use it wisely and be responsible.

**Here are 10 simple things you can start doing today to save water!**

1. Turn off **water** while brushing your teeth. ...
2. Turn off the tap while washing your hands. ...
3. Don't run **water** when hand-washing dishes.
